

Made-to-measure service case

The tool case that fits the job: we analyse which tools your service engineers really need, assemble them, choose case and transport and draw the inlay – on request through to the finished series case and its management.

DURATION

Concept 3–4 weeks

Why

Too heavy, incomplete, every service engineer packs differently: the case helps decide whether a job succeeds the first time. Missing tools are bought at the hardware store, excess baggage is paid, and at the customer the appearance looks improvised. The made-to-measure service case solves this systematically.

Who it's for

Heads of service at machine and plant builders with travelling service engineers – local or worldwide.

Your benefit

- Travel lighter: only what's really needed
- Always fully equipped – fewer repeat visits
- Uniform, professional appearance at the customer
- Managed on request: reorder missing tools by photo/QR

Prerequisites

- 3–6 service engineers for the workshop
- Existing cases and tool lists, where available
- Job profiles: product lines, travel mode, countries

How it works

- 1 Kick-off (remote, 1 h): goals, job profiles, travel mode, budget frame
- 2 On-site workshop (½–1 day): tool and job analysis with the service engineers
- 3 Concept (2–3 weeks): tool list, case, transport, inlay drawing, costing
- 4 Decision and approval of the sample case
- 5 Optional: sample case, series and case management subscription

Included

- Stage 1 “analysis & concept” for one job profile
- Tool survey as-is/to-be with the service engineers
- Case and transport selection, inlay drawing (CAD)
- Costing for sample case and series

Deliverables

- Tool list (Excel) with source, price, weight
- Case and transport concept
- Inlay drawing (CAD/DXF) with parts list
- Short report with decision paper

Not included and options

MC-ENG-021	Additional job profile	on request
	Sample case: assembly, inlay, acceptance	on request
MC-ENG-023	Series case per piece	on request
	Material: case, tools	purchase + handling
MC-ENG-025	Case management subscription	on request

Request a quote

Number of service engineers, job profiles and travel mode are enough – you receive a quote within two working days.
